

# Paper Review

Regoon Wang @ UNSW

April 27, 2014

# Contents

<b>1</b>	<b>Small Gain Theory</b>	<b>2</b>
1.1	Notations, concepts and preliminaries . . . . .	2
1.2	History root . . . . .	2
1.3	Recent achievement . . . . .	2
1.4	Future direction . . . . .	2
<b>2</b>	<b>Dissipative and passive</b>	<b>4</b>
2.1	Notations, concepts and preliminaries . . . . .	4
2.2	History root . . . . .	4
2.3	Recent achievement . . . . .	4
2.4	Future direction . . . . .	4
<b>3</b>	<b>Thermodynamics in control</b>	<b>5</b>
3.1	Notations, concepts and preliminaries . . . . .	5
3.2	History root . . . . .	5
3.3	Recent achievement . . . . .	5
3.4	Future direction . . . . .	5

# Chapter 1

## Small Gain Theory

1.1 Notations, concepts and preliminaries

1.2 History root

1.3 Recent achievement

1.4 Future direction

[\[1\]](#)

# Bibliography

- [1] Zhong-Ping Jiang and Yuan Wang. A generalization of the nonlinear small-gain theorem for large-scale complex systems. In *Intelligent Control and Automation, 2008. WCICA 2008. 7th World Congress on*, pages 1188–1193. IEEE, 2008.

## Chapter 2

# Dissipative and passive

2.1 Notations, concepts and preliminaries

2.2 History root

2.3 Recent achievement

2.4 Future direction

## Chapter 3

# Thermodynamics in control

3.1 Notations, concepts and preliminaries

3.2 History root

3.3 Recent achievement

3.4 Future direction
